

Secure Browser Instructions for Install - Mac

Please read the instruction prior to installing the file.

- 1) If you are updating the secure browser, first remove the existing secure browser.
- 2) Click on the link “Secure Student Browser” for the Zip file that contains the executable module.
- 3) Clicking the file once on a Mac will open the zip file and send the contents to “Your Downloads” folder.
- 4) The executable (*Riverside Secure Browser.app*) will be in the Download Folder.
- 5) The browser needs to be loaded onto each of the computers that will be used for testing.
- 6) It is suggested that the browser be made into a desktop icon that can be renamed to **Student Testing.app**.
- 7) All students will begin their test sessions by clicking on the icon which will present the Riverside Student Log In page.
- 8) The browser can be removed after all online testing is completed.

IMPORTANT NOTE: To quit / Stop the browser and return to the desk top; **press CTRL, SHIFT & Q** at the same time.
