Student Secure Browser Instructions for Windows and Mac

Windows

- Click on the link "Secure Student Browser - Windows" for the zip file that contains the executable module. (Note: if you are updating the browser, remove the existing executable before proceeding.)

- Place the executable as a desktop icon upon each of the computers that will be used for testing. You may choose to rename the icon (i.e. "Student Testing").

- At testing time, students will begin their test sessions by clicking this icon. The student sign in page for online testing will launch within kiosk mode.

- To exit the browser and return to the desktop, use **Ctrl+Shift+Q**

- The browser can be removed after testing has completed.

Mac

- Click on the link "Secure Student Browser - Mac" for the zip file that contains the executable module. (Note: if you are updating the browser, remove the existing executable before proceeding.)

- Clicking the file once on a Mac will open the zip file and send the contents to "Your Downloads" folder. The executable will be in the Download Folder.

- Place the executable as a desktop icon upon each of the computers that will be used for testing. You may choose to rename the icon (i.e. "Student Testing").

- At testing time, students will begin their test sessions by clicking this icon. The student sign in page for online testing will launch within kiosk mode.

- To exit the browser and return to the desktop, use **Ctrl+Shift+Q**

- The browser can be removed after testing has completed.
